

Tagtough Baton

Data Sheet

Features:

- Intrinsically safe certified
- Robust & durable
- Surgical grade stainless steel casing
- Hermetically sealed
- Waterproof
- Supplied with a branded pouch

The Tagtough baton is intrinsically safe certified with a very high protection rate all the way to zone zero (0), and manufactured to IP 69K standard making it not only safe, but tough and waterproof.

Intrinsic Safety Certificate

MS-XPL/18.1262 X

Specifications

Height	32mm
Width	32mm
Length	190mm
Weight	458g
Battery capacity	4 – 8 years
Memory	4,000 clockings
Manufactured	South Africa
IP code	IP69K

The Tagtough batons are used to clock points along a patrol route. The time and date of each clocking is stored on the baton to be downloaded at a later stage for reporting purposes. The baton has been designed as a low maintenance unit and if correctly used and properly looked after will only need to come in for a service when the battery needs replacement.
